Summer Camps 2022
Week of June 6, 2022 through July 29, 2022
Camp Location: 9850 N. Michigan Road Suite D
Carmel, IN 46032
Theme: Gaming

Overall Description:

Summer is a time for fun; therefore, it is hands on activities with project based language therapy! Our camps are designed for students with speech, language, or learning difficulties or for students who need to work on study strategies. We will utilize a fun theme, Gaming, to integrate our lesson plans for students while we listen, speak, read, spell, and write. We will use our gaming to imagine, create, and bring ideas to life. This exploration of games and creation of our own games will let learning unfold by creating an atmosphere that allows children to explore all things gaming! We achieve your student's goals through fun, food, inspiration, and building friendships.

Gaming: Speech and Language Skills for Learning Success
(Entering 1st-3rd) Tuesdays 10:00-12:00

This camp will focus on increasing vocabulary, sight word recall, and phonics skills for spelling and reading unfamiliar words, reading comprehension, and storytelling. This is also a great time to target generalization of speech skills (articulation and fluency).

Gaming: Let's Get Going on Speech & Language Skills for Literacy
(Entering PreK-Kindergarten) Tuesdays 1:00-2:30

This camp will focus on all speech and language areas needed for academic success. This includes vocabulary building, narrative development, phonological awareness skills (letter/sound identification, rhyming, blending, and segmenting) and sight words. In keeping with the summer theme, in addition to learning the alphabetic principle, speech sound awareness, and a visual phonics program, lessons will focus on all areas of language development while we provide sensory and motor planning experiences for the Gaming theme.

Gaming: Speech, Language, Learning, and Critical Thinking Skills
(7th-10th) Wednesdays 1:00-3:00

This camp for 6th through 10th graders ramps up the expectations for the reading comprehension, writing, and presenting. A strong emphasis will be placed on making inferences and predictions,

comparing and contrasting information as well as the planning and organization process for creating a project through Gaming and presenting on their creations.

Gaming: Speech, Language, Learning, and Critical Thinking Skills

(4th-6th) Wednesdays 10:00-12:00

This camp for 3rd through 5th graders ramps up the expectations for reading comprehension, writing, and presenting. A strong emphasis will be placed on making inferences and predictions, comparing and contrasting information as well as the planning and organization process for creating through Gaming and presenting on their creations.

Math Camp: Foundational Math Skills

(4th-9th) Mondays 1:00-3:00

This camp helps students struggling with math develop the foundational skills needed to succeed. During the summer, the students will be divided up based on what foundational skills they need and will be doing activities to help solidify these concepts. Each student will take a brief math assessment at the beginning of summer to determine what areas will be targeted. We will keep with the Gaming theme and develop a project that utilizes the math areas learned throughout the summer.

Please note, a camp must have at least 3 participants to be offered.

Please contact us if you are interested in individual therapy sessions.
